Please replace the paragraph at page 2, lines 11-16, with the following rewritten paragraph:

However, in the label software, in which, if the label has been corrected, only the latest information following the correction is preserved, so that it is not possible to identify what was the state of the label e.g., at an optional past time point. Moreover, if the label has been deleted, the data ~~converning~~ covering the label is completely erased, so that the label cannot be seen again, for example, the label cannot be re-displayed on the desktop.   IDC-A2,AMD

Please replace the paragraph at page 2, lines 18-21, with the following rewritten paragraph:

It is therefore an object of the present invention to provide an information processing method and apparatus, and a medium, ~~wherebythe~~ whereby the state of a label at an optional past time point can be identified and whereby, if the label is deleted, the label can be regenerated.   IDC-A3,AMD

Please replace the paragraph at page 6, lines 19-20, with the following rewritten paragraph:

Fig.27 shows the relationship between data of the project, ~~labe land~~ label and the object handled by the label software of the present embodiment.   IDC-A4,AMD

33   21 through page 34 line 5   SS 5-25-06

Please replace the paragraph at page 34, lines 10-16, with the following rewritten paragraph:

The label software of the present embodiment is an application program for realizing, on a desktop screen of a personal computer, the operation of exploiting a tag sheet attached as an index mark ~~tie~~ to a paper document, writing a memo on the tag sheet and affixing it   IDC-A5,AMD,M

somewhere for use as a reminder. In the present embodiment, the label sheet displayed on

the desk top screen is called a label sheet and an application program for displaying the label

on the desk top is called the label software.

lines 6-15 SS 5-25-06
Please replace the paragraph beginning at page 34, line 17, through page 35, line 5,

with the following rewritten paragraph:

The label software of the present embodiment has the functions of handling the text of

letters or symbols, still pictures, speech or music sound, as an object that can be affixed to the

label as a tag sheet displayed on the desk top, editing a text affixed to the label, the recording

and/or reproducing function of the sound affixed to the label, capturing/displaying a picture

to be affixed to the label and cooperating with a application software fir for capturing the

picture from the CCD camera attached to the personal computer. The label software of the

present embodiment also includes the functions of preparing a label having a change

hysteresis as the temporal management function, fully supporting the jog dial with respect to

the temporal management function and of handling a link as an object affixed to the label.

IDC-A5,AMD,M

lines 5-7 SS 5-25-06
Please replace the paragraph beginning at page 61, line 19, through page 62, line 1,

with the following rewritten paragraph:

A project manages the entire labels belonging to the project. The label software of the

present embodiment is so formulated that a prjeot project will necessarily be opened on

actuation.   IDC-A6,AMD

61   12-14 SS 5-25-06
Please replace the paragraph at page 62, lines 6-8, with the following rewritten

paragraph:
